2013-04-30 workplan_redline_ljp.docx

Adam,

We're close. Attached is the workplan with all the changes you proposed accepted, and then I marked up the clean document with some minor changes and added a few comments requesting clarification. Take a look and see if you'd rather work on it collectively during the Thursday call or something else.

Leslie Patterson

Hi Leslie, that's correct, the filtering discussion is in Appendix J-F-16.

Sorry about the delay, I thought I had responded.

For next Thursday's call, if you and Ohio EPA have comments that you think can be incorporated directly, we could do the call as a WebEx and make the changes directly during the call so that everyone can see and agree on the changes in real time. Whether that works depends on the volume and nature of the comments obviously, but I thought I'd make the suggestion in case it will make the comment/response process easier.

Adam

Adam, were you able to check on that SOP?

Hi Leslie,

I'm out of the office so I don't have the FSP handy, but I believe that's the one. I will check on Monday morning and confirm.

On yesterday's call, I believe I said, we'd send you the revised work plan today, but I should have said Monday - I had the various outstanding reports confused. Please let me know if you have any concerns.

Thanks, Adam

Adam, to follow up on our call today and the discussion about filtering samples for VOC analysis, is the filtering procedure described in Appx. J-F-16 of the 2011 Field Sampling Plan, or is there something else? Thanks.
